

Smart hipot DC up to 60 kV

,

llustrative Image

Features

- Smart hipot DC up to 60 kV
- Leakage current up to 6 mA
- Remote control by Android device
- Measures the output voltage and leakage current
- "Pass/Fail" LED indicator
- Adjustable parameters: voltage, maximum leakage current, ramp and test duration
- Ripple < 2 %
- Polarity: negative voltage, positive ground
- USB and Bluetooth interface
- · Built-in memory to store test results
- Lightweight and robust, developed for field work
- Computer software for test report generation

Sparks auto-detection

In the event of a spark (e.g. rupture of the insulation of the element under test), the high voltage generation is automatically interrupted

Description

Remote control by App

The Smart Hipot DC **HP60KV** is an instrument for the latest generation dielectric tests. The voltage output is adjustable, reaching up to 60,000 V of direct current. For being digital, it is possible to program the voltage, test duration, maximum leakage current and ramp rise or fall, allowing to perform more sophisticated tests automatically.

Has one LED to indicate the presence of high voltage in the output terminal during a measurement and one bi-color LED to indicate the test result (Pass / Fail).

Meeting the most stringent security requirements, the system is divided into two modules, one for control and the other for high voltage. The high voltage module is equipped with an audible alarm and both modules have emergency stop switch. Through an Android device it's possible to program all parameters of the hipot, besides remotely controlling the tests, further increasing the security.

Remote control by Android[™] App

Increased safety and comfort: Set up, start and stop tests in an even safer and more comfortable way

Automatic reports: Generate test reports directly on the App

Smartphone / tablet features: Incorporate smartphone features into your reports (photo, GPS coordinates and test location map)

Modbus[®] Protocol

This equipment implements the Modbus® open protocol. All configuration, realtime control, monitoring of measurements, and retrieval of test information can be performed using commercial tools such as LabVIEW® and PLCs, or even through dedicated software and own development. In this way, the entire measurement and analysis process can be automated according to the application's needs. Complete documentation with accessible and controllable parameters is provided, as well as clarification of doubts about the use through technical support.

- Modbus is a registered trademark of Schneider Electric USA, Inc.
- LabVIEW is a registered trademark of National Instruments Corporation

Technical specifications

ELECTRICAL	HP60KV				
Test voltage	2,000 V up to 60,000 V				
Test voltage resolution	100 V from 10 kV up to 60 kV 10 V up to 9.99 kV				
Test voltage accuracy	± (2 % of nominal value ± 2 digits) with 1 mA load				
Polarity	Negative voltage, positive ground				
Leakage current	Max. 6 mA				
Leakage current resolution	0.01 mA				
Leakage current accuracy	± (2 % of nominal value ± 2 digits)				
Ripple	< 2 %				
FEATURES					
Measuring modes	Manual mode, Auto, SVT, Ramp test and "Pass / Fail" test				
Safety	Emergency stop switches, Sparks auto- detection, Visual indicators (LEDs) and Audible indicator				
Display	Alphanumerical LCD display, 4 lines / 20 characters (Big Number)				
Chronometer	Up to 20 min., indication in seconds				
Built-in memory	Memory for storing up to 16,000 measured values				
STANDARDS					
Safety	IEC 61010-1				
COMMUNICATION					
Protocol	Modbus				
USB	For configuration, control and download the stored values				
Bluetooth	For configuration, control and download the stored values				
SOFTWARE					
Desktop (PC/Notebook)	Megalogg 3 software: for remote control, allowing to configure, run tests and generate reports				
Android (Smartphone/ Tablet)	BlueLogg app: for remote control, allowing to configure, run tests and generate reports				

ENVIRONMENTAL						
IP rating	IP65 (with closed lid)					
Operating temperature	-5 °C to 50 °C					
Storage temperature	-25 °C to 70 °C					
Humidity	95 % RH (non condensing)					
POWER SUPPLY						
Mains	200 - 240 V~ 50/60 Hz 450 VA					
MECHANICAL (OF THE INSTRUMENT)						
Weight	Control module: approx. 7.6 kg High voltage module: approx. 9.6 kg					
Dimensions	Control module: 450 x 360 x 190 mm High voltage module: 450 x 360 x 190 mm					

Included accessories

- Interconnecting cable (control high voltage modules)*
- High voltage cable*
- Return cable*
- Protective ground cable*
- Power cord
- USB cable
- User guide
- Megalogg 3 software (download)
- BlueLogg app (download)
- Control module carrying bag
- High voltage module carrying bag
- * Supplied in different lengths on request.

Remote control by App

BlueLogg

Full control in your hand

Get full control of your MEGABRAS instrument through the BlueLogg application. Set parameters, start/stop a test, save data and generate reports.

Increased safety

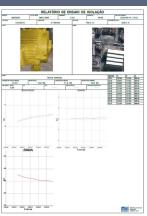

The BlueLogg communicates with the equipment through a Bluetooth® connection, allowing remote control of the tests, further increasing user safety in tests with potential risks.

Smartphone features and automatic reporting

Record voice comments for each of the measurements, generate automatic test reports directly in the App. Incorporate smartphone / tablet features into the report (picture, GPS coordinates and map of the test site).

Using the remote control does not require Internet connection (the Internet is only necessary if you want to see a map of the test site or send reports by email).

- Android, Google Play and the Google Play logo are trademarks of Google LLC
- Bluetooth is a registered trademark of the Bluetooth SIG, Inc. Worldwide

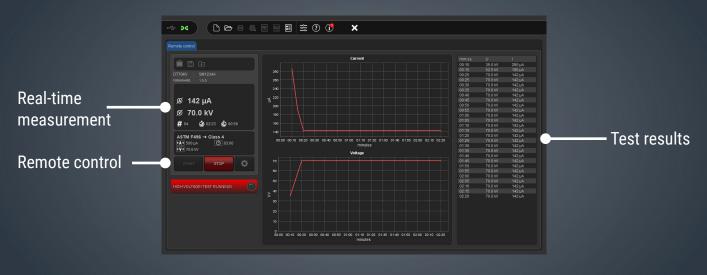

Desktop software

MegaLogg **3**

Software for remote control and reporting

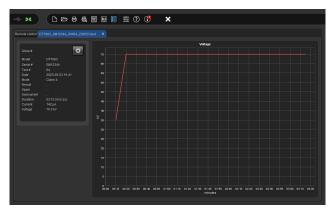

MegaLogg 3 communicates with the equipment through a USB connection. Set the parameters, start / stop a test, save the data and generate reports.

Available for download at: www.megabras.com/megalogg
